

INSTRUMENT & SWITCH SHROUD

JOB SITE SAFETY IS A TOP PRIORITY. PROTECT YOUR ASSETS.

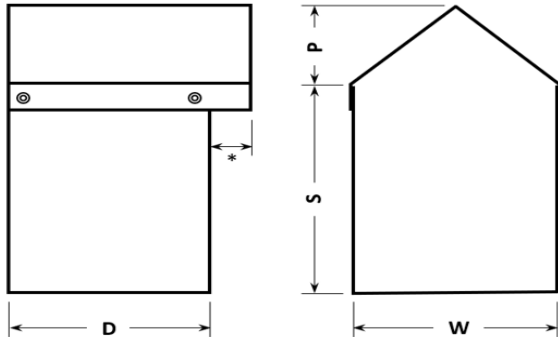

Accidental ESD Deployment can be costly. The alternative can be deadly! Safeguard your resources by installing Pembina's innovative Instrument and Switch Shroud.

- 🕒 Gable Style "Birdhouse" design sheds snow, ice and rain away from the device preventing debris buildup and accidental tripping
- 🕒 Galvanized Steel Housing resists corrosion
- 🕒 Maintenance Free Powder Coated finish is visible, long-lasting and durable
- 🕒 Threaded Mounting Pems provides easy, consistent assembly for most control stations
- 🕒 Vertical slots allow for mounting flexibility
- 🕒 Lexon cover prevents accidental deployment and inhibits snow, ice and dirt buildup when cover in place (Switch Shroud only)
- 🕒 Bottom access for manual reset maintains weather protection (Switch Shroud only)
- 🕒 Custom sizes available made to order

ENGINEERED PROTECTION OF CRITICAL PROCESS CONTROL DEVICES

Shroud installation has often been an afterthought resulting in unsatisfactory protection from harsh and/or hazardous conditions. Pembina's Instrument & Switch Shroud assembly features an Integral Design that wraps the device 360 degrees for increased Safety and Protection.
