

NOSHOK

Industry-Leading Warranties

Electronic Pressure Measurement Solutions

Improve Process Quality

Increase Process Efficiency

Ensure Process Safety & Integrity

Highly repeatable transducers & transmitters with excellent long term stability & accuracies up to ± 0.025 full scale

- FM & CSA approved hazardous location transmitters, including explosion-proof Class I, Div. I, non-incendive Class I Div. II, and intrinsically safe Class I Div. I
- cULus listed transmitters
- NOSHOK offers full service electronic calibration services traceable to NIST

Multiple standard options and customized engineered solutions to address your specific process requirements

- Excellent response times up to ≤ 1 ms to address processes that require faster update rates
- Outstanding durability up to 100,000,000 load cycles
- A wide variety of pressure ranges from ultra low to ultra high are available, as well as multiple process & electrical connections and output options for a customized approach

Industry-leading, high quality products backed by 3-year warranty

- NOSHOK is ISO 9001:2015 registered to ensure our processes deliver consistent quality and performance
- In addition to an extensive product portfolio, NOSHOK employs best practices in coordination with the user to sustain optimal process quality
- A wide variety of accessories and options are available
