

NOSHOK

Valve Solutions

Industry-Leading
Warranties

Lower Maintenance Costs

Reduce Unscheduled Maintenance Down Time

Protect Your Assets

Safely isolate measurement devices from the process to protect equipment and personnel

- Comprehensive line-up of high quality, made in the U.S.A., standard and large bore needle, block & bleed, and manifold valves
- Patented valve design provides exceptional performance and increased pressure capabilities in hard or soft seat/tip designs with industry leading pressure ratings up to 10,000 psi

Replace measurement devices without shutting down the process

- Needle valve offering includes mini valves, multiport, standard valves, block & bleed with a variety of configurations and options
- Multiport valves designed so multiple measurement devices can be isolated from the process through one process connection, reducing leak points
- Manifold valve offering includes 2-valve, 3-valve, and 5-valve natural gas designs with a variety of valve configurations and options

Perform in-line calibration and verification of the measurement devices

- 3-Year Warranty on ALL NOSHOK Valves

- All NOSHOK Valves are 100% helium leak tested for guaranteed performance and reliability

- Zinc-nickel plating standard on carbon steel valves which provides outstanding corrosion resistance and long lasting durability

- Consistently smooth handle operation

- Flare Pattern™ and 90° Angle Manifolds, as well as customized engineered valves
