

FLOW MEASUREMENT

Accurate flow rate measurement using the correct flow meter is paramount to ensure fluid & gas control processes run smoothly, safely, and cost effectively.

A large part of our product suite is dedicated strictly to flow measurement.

If it's flowing through a pipe, we've got a way to measure it!

Pembina Controls Inc. has been in the flow measurement business since our inception. Give us a call with your application or to learn more, please visit Pem-Controls.com or contact us at sales@pem-controls.com

We understand you have a choice where you send your business.

When you choose Pembina Controls and our manufacturing partners, our goal is to ensure you are so impressed with our products and service, that you are confident in recommending us to you colleagues, clients and friends.
